

The Publishing Group at HPC

Paid | On-Campus

The Publishing Group at the High Performance Computing Collaboratory is looking for one or two communication/technical writing interns. These students will assist with writing press releases, news articles, technical- and-feature stories for various research websites and print publications for the various HPC² member center and institutes. There are also opportunities to help take photos at events and contribute design ideas for print and Web projects. Applicants should be in good academic standing and have:

- Strong writing skills and knowledge of Associated Press style
- An understanding of various newswriting styles and techniques
- Familiar with the process of conducting an interview for a story—friendly and courteous client interaction.
- The ability to prioritize projects and meet deadlines—multitasking is necessary
- The ability to translate technical language into a story a lay person can understand
- Takes direction well

Photography, graphic design and Web skills are a plus and could lead to additional portfolio-building opportunities. Ideally, the intern(s) will be able to start this fall and continue to work with the office through the school year.

While gaining valuable work experience in the HPC² Publishing Office, the intern will also earn an hourly wage. The technical writing/communication student intern(s) can work up to 20 hours a week in this position.

Interested students should submit their resumes and samples of their work to Diane Godwin, Diane@hpc.msstate.edu.
