

Shared Advancement Services

PAID | On-Campus | Year-Long

We will have a paid internship position available in Shared Advancement Services starting this summer. We'd like to have someone who is a rising junior, and the internship will last until next May, potentially longer. We'll offer experience in event planning, public relations, communication writing, and management, in addition to exposure to some of the University's top leadership and major donors.

Interested applicants can contact Bailey Poindexter for more information.
